Didik Ismawanto

Senior Mobile Engineer | React Native, Flutter & Android

Kediri, Indonesia (UTC+7) · Available for time-zone overlap · +62 812-2683-9119 · ismawantodidik@gmail.com · didikk.github.io · LinkedIn: linkedin.com/in/didikismawanto

Summary

Senior mobile engineer with 11 years of experience shipping Android and iOS apps, including 7+ years of React Native and production Flutter since 2025. Modernizes legacy apps by rewriting them in React Native and Flutter, with Clean Architecture and testable code.

Since 2020, has led front-end and mobile development for Synergy Worldwide's Kiosk App and its supporting apps, used in stores across Japan, Korea and Taiwan. Works remotely with an international product and engineering team. Background in native Android (Kotlin, Java) and web front-end (React, Angular).

Experience

Synergy Worldwide – Remote

Lead Front-End/Mobile Developer (Part-Time Contract) | Jul 2020 – Present

- Lead development of the Kiosk App plus four supporting apps for stores in Japan, Korea and Taiwan. All Flutter apps use Clean Architecture, dependency injection and BLoC/Cubit, running on both iPads and Android tablets.
- Kiosk App: proposed and led two full rewrites, from Cordova/Angular to React Native, then to Flutter.
- Pickup Center App (Korea and Japan): led two full rewrites, from Cordova/Angular to React Native, then to Flutter.
- In-Store Pickup App: built the first React Native version, then rewrote it in Flutter.
- Order Status Board (in-store TV display): rewrote it from Angular to React.
- In-Store Pickup Screen: maintain this Angular web app used by store staff to process orders.
- Integrated regional services: Suntech (Taiwan) and GMO (Japan) for payments; NICE CheckPlus (Korea) and TWCA (Taiwan) for identity checks; DocuSign (Japan) for e-signatures.

- Front-end team of 2, working with backend, QA, product, analysts and a scrum master. As lead: review code, estimate tasks, assess new designs, make architecture and tech-stack decisions, set up CI/CD in Azure DevOps, and define coding standards and the pull request workflow.

Self-employed – Remote

Mobile Developer (Flutter), Freelance | Nov 2025 – Present

- **Maritim Hub** (team of 3, published app): built the request detail page, with layouts rendered from data for about 80 request types.
- **Kura-Kura Coffee POS** (solo, in use by the business): cashier app with ordering, Cash and QRIS payments, and Bluetooth receipt printing. Includes an admin area for products, stock and settings, plus sales charts and daily reports.
- **King Glossy** (solo, ongoing maintenance): app for a car care shop to track services, invoices and expenses. Includes monthly reports and customer statistics.

Farmbyte Sdn Bhd – Remote

Mobile Developer (React Native), Contract | May 2025 – Sep 2025

- Built new features and fixed bugs in a new React Native and TypeScript app replacing the legacy Android app, as part of an 8-developer mobile team.
- Created onboarding and product management modules for the Seller Center marketplace.
- Built components for the shared internal UI library.

PT. SiCepat Ekspres Indonesia – Jakarta, Indonesia

Mobile Developer (React Native) | Apr 2022 – Apr 2025

- Maintained the SiCepat Ekspres app (Android and iOS, 500K+ Google Play downloads) and shipped new features.
- Proposed and led a full rewrite of the app to unblock React Native upgrades, alongside a redesign. Team: 2 mobile, 2–3 backend, 1 QA, 2 product.
- Organized the new codebase with Clean Architecture and feature-first folders, keeping each feature in one place.
- Replaced MobX with Zustand for simpler state that works outside components, and React Query for server state.
- Separated business logic from UI, making the code easier to unit test with Jest and React Native Testing Library.

- Integrated Midtrans and Xendit payment gateways, and MoEngage and Insider for customer engagement.
- Developed the Pick Up app for the daily operations of Sigesit couriers.
- Automated builds and releases with Fastlane.
- Reviewed pull requests for the mobile codebase.

Pintar Ventura Group – Jakarta, Indonesia

Mobile Developer (React Native) | Jul 2021 – Mar 2022

- Built the Klikoo PPOB app with React Native, GraphQL and Apollo Client. API-driven dynamic forms let new bill-payment services launch without an app update. Mobile team of 4–5.
- Reduced GraphQL over-fetching by restructuring queries to request only the fields each screen needs.
- Developed the Posy POS app with responsive layouts for tablets and phones.

PT. Media Data Communication – Jakarta, Indonesia

Mobile Developer (Android & React Native) | Sep 2018 – Jul 2021

- Built the Meenistry B2B venue management app in native Android, then helped rewrite it in React Native for Android and iOS. Team: 2 mobile, 2 backend, 1 front-end.
- Wrote unit and UI tests for the native Android app with JUnit, Mockito and Espresso.
- Created Meeva, an Android and iOS booking app for meeting rooms, ballrooms and co-working spaces.
- Set up build and release pipelines in Azure DevOps.

Jukir.co – Jakarta, Indonesia

Android Developer | Jun 2018 – Sep 2018

- Stabilized the Jukir app by fixing crashes and architectural debt, and developed the Park Go parking app in Kotlin.

PT. Creoactive Cipta Media – Jakarta, Indonesia

Android Developer | Feb 2018 – Jun 2018

- Built the Truvel Hotel guest service app, with a custom launcher for device lockdown and Linphone VoIP calls to the front desk.

Firzil Tech – Surabaya, Indonesia

Android Developer | Sep 2015 – Feb 2018

- Shipped client Android apps to Google Play using Java, Kotlin and MVP, and created shared UI components and utility functions.

Skills

- **Mobile:** React Native, Flutter, Android SDK, iOS (App Store releases), tablet and kiosk apps
- **Languages:** TypeScript, JavaScript, Dart, Kotlin, Java
- **Architecture:** Clean Architecture, feature-first modular structure, MVVM, MVP, dependency injection, reusable UI components
- **State & Data:** Zustand, React Query, Redux, Redux Toolkit, MobX, BLoC/Cubit, Provider, GraphQL (Apollo Client), REST APIs
- **Web Front-End:** React, Angular
- **Testing & Delivery:** Jest, React Native Testing Library, JUnit, Mockito, Espresso, CI/CD, Fastlane, Azure DevOps, Git
- **Integrations:** Midtrans, Xendit, Suntech, GMO, NICE CheckPlus, TWCA, DocuSign, MoEngage, Insider, Firebase, Bluetooth thermal printers, Linphone VoIP
- **Engineering Practices:** Agile/Scrum, code review, task estimation, coding standards, pull request workflows, app rewrites, refactoring

Education

Politeknik Elektronika Negeri Surabaya – Diploma III (D3), Informatics Engineering | 2012 – 2015

Languages

Indonesian (native) · English (professional working proficiency)
